1. Vegetation surrounding Opanuku Stream is a mix of exotic and native species with a moderate level of natural character

2. The width of the road corridor varies along the alignment along with the proximity of trees, but is generally open with sufficient space available.

3. On Summerland Drive there are a number of small Magnolia trees which have been planted as street trees. However, they are not of scale yet to influence the character of the area

4. The bush at the Woodland reservoir is a predominantly native and well-established, providing a high level of amenity and natural character to the area.

1. View along Shetland Street

2. View from intersection of Phillip and Shetland Streets
